

# Pumpkin Bowling

10/13/2015

In our never-ceasing search for pumpkin uses, yesterday we discovered that little pumpkins roll surprisingly well down ramps. This morning, the children encountered movable cardboard ramps, a patch of tiny pumpkins, and foam blocks. Quickly they recalled the previous morning and began launching them down the ramp. The portable ramps often required some fixing, but trial and error showed us how to build the best ramps for rolling.

***It's on its bottom. It's slower.***
